Weather-shield Outdoor Fabric

Polyester in general is a synthetic fabric that begins as a polymer melt (liquid form). In the solution-dyeing process, the colour is added during the liquid stage. Prior to being cooled and spun into synthetic fibres. Since the colouring goes through and through and isn't just applied to the surface of the material, the fabric retains its properties more than a stock-dyed fabric would when exposed to intense sunlight and air pollutants.

- 100% Solution Dyed Polyester
- High UV and mildew/mould resistance
- Highly water resistant
- Excellent tear and abrasion resistance
- Non-abrasive to gel coat and other popular marine finishes
- Weather-shield Outdoor Fabric is designed to be easy to care for. It can be washed, or brushed off and rinsed
- Weather-shield Outdoor Fabric is designed to be flexible and easy for manufacturers to use. Its urethane coating enhances the stability of the weave and allows for greater water resistance, while also minimizing shrinkage and stretching.
